PROFESSIONAL SUMMARY

Career-changing full-stack developer with 12 years of professional experience in critical-care medicine, where precision, composure under pressure, and audit-grade documentation are non-negotiable. Currently completing Codeboxx's immersive full-stack bootcamp — building applications with JavaScript, Node.js, Express, and MongoDB — while bringing a decade-plus track record of reliability, cross-functional collaboration, and rapid problem-solving in high-stakes settings.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express, React, Node.js

Core Competencies: RESTful API design, CRUD operations, HTTP (GET/POST), middleware (logging, authentication), full-stack architecture, agentic AI

Tools & Workflow: Git, GitHub, Postman, VS Code, Microsoft Teams, AI-assisted development

Enterprise Software: Cerner EMR, Breeze (PFT)

TECHNICAL TRAINING

Codeboxx — Full-Stack Developer Bootcamp

Expected Completion: October 2026

- Immersive 32-week program in full-stack development using the MERN stack; currently in Module 5 of 16 and on track for completion in October 2026.
- Build and ship deliverables in a work-simulation environment with structured office hours, sprint cycles, and peer code review — mirroring modern agile engineering workflows.
- Master the full MERN curriculum: front-end fundamentals, back-end architecture with Node.js and Express, database operations with MongoDB, RESTful API design, and middleware implementation.
- Translate business documents into technical requirements; follow professional Git/GitHub practices including frequent, meaningful commits and scalable repository structure; leverage agentic AI as a development aid.

PROFESSIONAL EXPERIENCE

Registered Respiratory Therapist — St. Anthony's Hospital, St. Petersburg, FL *January 2020 – Present*

- Deliver critical-care respiratory therapy across emergency, ICU, and floor units, making rapid, evidence-based decisions in environments where errors carry severe clinical and legal consequences.
- Maintain precise, audit-ready documentation in the Cerner EHR for a high-volume patient load, balancing accuracy with time-sensitive clinical workflow.
- Perform diagnostic pulmonary function testing (PFT) on the Breeze platform; calibrate equipment daily and execute protocols in full compliance with American Thoracic Society (ATS) repeatability standards.
- Interpret complex clinical data (arterial blood gases, ventilator parameters, patient vitals) to diagnose issues and adjust treatment plans in real time.
- Collaborate cross-functionally with physicians, nurses, and specialists; translate complex technical information clearly to non-technical stakeholders under emotionally charged conditions. Recognized by management for consistent, independent, error-free execution; informal mentor and go-to resource for colleagues and new hires.

Registered Respiratory Therapist — Mease Countryside Hospital

March 2017 – January 2020

- Provided respiratory care across emergency, critical care, and pediatric departments; rapidly adapted clinical approach to diverse patient populations and acuity levels.

Registered Respiratory Therapist — Kindred Hospital

March 2016 – March 2017

- Specialized in long-term acute care of the chronically critically ill; managed aggressive ventilator weaning protocols, continuous airway monitoring, and tracheostomy care.

Registered Respiratory Therapist — St. Joseph's Hospital

January 2015 – January 2016

- First post-credential role; rotated through ICU, pediatrics, emergency, and floor therapy to build a broad clinical foundation.

EDUCATION & CREDENTIALS

A.S., Respiratory Care, St. Petersburg College (2014) • **A.A.**, Pasco-Hernando Community College (2009)

Credentials: Registered Respiratory Therapist (RRT, #13822) • CRT • ACLS • BLS
